@JahanzaibTayyab

PROFESSIONAL EXPERIENCE

Mavric, Full Stack Engineer Oct 2024 - present

-Develop & maintain dynamic, responsive web apps prioritizing user experience & client requirements.

-Architected and optimized front-end user interfaces with React/Next.js, boosting performance by 30% and enhancing user engagement.

-Developed robust Node.js back-end APIs, handling data modeling and ensuring secure integration with th party services.

-Resolved IoT-related issues that reduced processing times by 40%, collaborating closely with hardware te to ensure data accuracy and reliability.

-Hands-on experience with AWS cloud infrastructure, including Lambda, EC2, S3, and deployment automation using AWS CDK. Led cloud integration efforts for file storage, email notifications, and backend services in collaboration with the DevOps team, ensuring reliable production deployments.

-Led agile ceremonies (stand-ups, sprint planning), coordinating across teams to deliver features on sched and improve cross-functional collaboration.

Devigital System, Software Engineer Feb 2021 - Oct 2024 | Lahore, Pakistan

-Engineered a B2B SaaS platform (React/Node.js/PostgreSQL) handling 200K+ monthly transactions, optimizing database indexing to reduce query times by 45%.

-Enhanced Node.js back-end services to support scalable API endpoints, improving response times by ~25 and streamlining data flow for critical business operations.

-Integrated basic AWS offerings (EC2, Cognito) ,third-party APIs (Stripe, HubSpot) for payment processing CRM, improving user retention by 20% through seamless UX flows.

-Conducted code reviews and mentored junior developers on best practices in JavaScript/TypeScript, raisi overall team proficiency.

-Implemented TDD/BDD approaches for key features, significantly reducing bugs in production and boostin

confidence in rapid iterations.

Interns Spark, Web Developer (Intern) Aug 2020 - Nov 2020 | Lahore, Pakistan

-Contributed to front-end development efforts in a small, agile team, implementing responsive layouts and ensuring cross-browser compatibility.

-Resolved priority bugs to improve performance and user engagement, receiving commendations for quick turnaround times.

SUMMARY

Experienced in: maze, framer, adobe xd, motion graphics, wireframing, accessibility, figma, webflow, sketc

Job-Relevant Keywords: ui/ux designer.

SKILLS

Programming Languages: - JavaScript(ES6+), TypeScript, Python3, SQL, HTML/CSS

Front-End: - React, Next.js, Redux, Material-UI, Chakra UI, Tailwind CSS

Back-End: - Node.js, Express, NestJS, TypeORM, Prisma, REST APIs, GraphQL,OpenAI API,Drizzle, Pris

- Poetry, Express, RDS, Crew AI, Open AI, LangGraph, Agentic

Security & Compliance: - OAuth 2.0, JWT, Role-Based Access Control (RBAC), GDPR Compliance

- Database - PostgreSQL, SQL, MongoDB, Firebase, Supabase

Tools & Practices: - Git, JIRA, Agile/Scrum, TDD, BDD, Webpack, Jest, Cypress , n8n

Cloud & DevOps: - AWS (EC2, S3, RDS, Cognito, Lambda), Docker, CI/CD Pipelines

EDUCATION

PIAIC, Certified Cloud Applied Generative AI Engineer Nov 2022 - present | Lahore, Pakistan

CUI Lahore, Bachelor?s Software Engineering Feb 2017 - Jan 2021 | Lahore, Pakistan

INDUSTRY PROJECTS

Wise Pelican

Led the backend development of an Agentic AI-powered SMS bot, integrating LLMs using OpenAI Agent S
and the MCP server, while architecting scalable Node.js services and managing third-party API integrations

Built a custom real estate postcard builder using Node.js, IDML, and Parse, with a focus on performance optimization and scalable design.

Collaborated on full-stack integrations involving MongoDB, AWS, GCP, and Azure, and contributed to UI d
remapping for accessibility and consistency.

Technologies: Node.js, IDML, Parse, MongoDB, OpenAI Agent SDK, MCP, TypeScript, AWS, GCP, Azure

Linus Analytics

-Developed a multi-tenant web interface for IoT-enabled scrap collection, integrating NextJS (App Router) a
NestJS to manage real-time data.

-Implemented React-Query and Material UI for fast rendering and consistent design across devices, ensuri
reliability for diverse user bases.

-Integrated AWS Cognito for secure authentication, coordinating with DevOps teams for scalable deployme

Technologies: NextJS (App Router) ,Next-Auth ,React-Query, Material UI , Formik , NestJS , Typescript, A
Cognito , Mailjet , TypeORM , PostgreSQL, IoT, MQTT

Signa Capture

-Built an album-design platform with NodeJS (Express) and ReactJS, focusing on front-end polish and straightforward user flows.

-Reduced server response time by 20% using caching strategies and optimized queries.

Technologies: PostgreSQL, NodeJS (Express) and ReactJS

Table Cloth

Developed a SaaS solution (Node.js back-end, React front-end) to track and report ESG metrics for private
investors, leveraging Redux and Material UI for a clean, cohesive interface.

Technologies: PostgreSQL, NodeJS (Express), ReactJS, Redux, Material UI

Welfie - Wellness Selfie

Health , Online Doctor Session and COVID-19 Test Status and Vaccine Status Management for Communit

Technologies: React Js , Material UI , Reactstrap , SCSS , Node Js , Express , PostgreSQL , Typeorm , AV

Lambda Functions , Stripe , GetStream Chat Api

CERTIFICATES

Generative AI for Everyone AWS Fundamentals: Addressing Security Risk

Industrial IoT on Google Cloud Essential Google Cloud Infrastructure: Foundation

Google Cloud Fundamentals: Core Infrastructure AWS Fundamentals: Going Cloud-Native
