EMAN ZAHID

Python Developer & Data Analyst

Phone: +92-328-8121644 | Email: emanzahid234@gmail.com

CAREER OBJECTIVE

Dedicated and enthusiastic Computer Science student with hands-on experience in Python development, data science projects, and operational coordination. Passionate about problem-solving, continuous learning, and contributing to collaborative environments. Seeking an opportunity to apply technical and management skills in a growth-oriented organization.

WORK EXPERIENCE

Remote Assistant – Email Marketing & Operations

Aug 2024 – Present

Freelance / Contractual Role
Clients: LavieLabs, ZAS Health Services

- Managed and executed targeted email marketing campaigns for LavieLabs
- Coordinated daily administrative and operational tasks for ZAS Health Services
- Ensured timely communication, task execution, and performance tracking across remote teams

TECHNICAL SKILLS

Python (Intermediate): Logical programming, console-based applications

C++ Programming: Object-oriented fundamentals and structured programming

Object-Oriented Programming (OOP): Class-based design and modular coding

Data Structures & Algorithms: Lists, dictionaries, arrays, loops, and control statements

Database Concepts: Basic SQL operations, CRUD logic

Google Colab: Python development and notebook-based coding

Git & GitHub: Version control and collaborative project management

Microsoft Office Suite: Word, Excel, PowerPoint (Documentation & Reporting)

Team Collaboration & Task Coordination: Strong interpersonal and project management abilities

Data Analysis: Matplotlib, Pandas, Seaborn, Scikit-learn

PROJECTS

Python Mini Projects (Google Colab-based)

Inventory Management System: User-friendly system to manage products, stock levels, and real-time updates using lists/dictionaries.
Banking System: Implemented basic banking operations such as account creation, balance inquiry, deposit, and withdrawal using a text-based interface.
Movie Ticket Booking System: Enabled users to view available showtimes, select and reserve seats, and receive confirmation, with seat availability tracking.
Library Management System: A simple module to issue and return books, track borrowers, and manage book availability status.

Data Science Projects

Road Hotspot Analyzer: Identified high-risk accident zones using traffic datasets. Visualized patterns using Matplotlib, Pandas, and Seaborn.
Movie Recommendation System: Designed a content-based filtering engine using genre and keyword similarity for user-specific movie suggestions.
Music Recommendation System: Developed a personalized music suggestion system based on listening patterns and song metadata using Pandas and Scikit-learn.

EDUCATION

BS Computer Science
Minhaj University, Lahore — 2023 – Present

FSc Pre-Medical
KIPS College, Lahore — 2021 – 2023

CERTIFICATIONS

Pitman Certificate (February 2024 – April 2024)

LANGUAGES

English: Fluent
Urdu: Native
