EXPERIENCE

Front-end Intern | developershub.co | Mar 2025 – May 2025

- Developed responsive front-end components for an e-commerce platform using React.js
- Collaborated with development team to implement UI/UX designs and create reusable components
- Applied responsive design principles ensuring cross-device compatibility
- Improved code efficiency through component reusability and modern React patterns

---

PROJECTS

E-commerce Website | Live Demo | GitHub

- Built a desktop-oriented e-commerce website using React, Tailwind CSS, and React Router
- Implemented product search/filtering functionality and utilized Context API for cart management
- Focused on pixel-perfect design and responsive layouts before deploying on Vercel

Gym Website | GitHub

- Developed a fully responsive website for a gym business showcasing services and subscription plans
- Created interactive UI elements and implemented modern CSS techniques for smooth animations
- Optimized for all device sizes with responsive design principles

Calculator Application | GitHub

- Built a functional calculator application with clean interface and accurate calculation handling
- Implemented core programming concepts including event handling and mathematical logic

---
