WORK EXPERIECE

02/2023 - Present

Lahore, Pakistan

.NET Developer

Exa Data Solutions (Pvt.) LTD

Software House

Throughout my time at Exadata Solutions, I was responsible for the following assignments:

- Developing Supply Chain and Finance modules for the ERP System of the Apparel Industry.
- Providing support for existing ERP systems by developing new features and customizations and handling the database.
- Upgrading existing ERP systems and implementing new ones as per the project needs of clients in the Jeans Industry.
- Conducting troubleshooting and debugging activities as required to ensure system functionality.
- Conducting troubleshooting and debugging activities as required to ensure system functionality.

SKILLS

Programming Languages: C, C++, C# ASP.NET MVC ASP.NET Web Forms .NET Desktop Application JWT token for security Code Repositories: GitHub Win Forms HTML JavaScript CSS Database: MS SQL Server ORM: Entity Framework, ADO.NET Reporting: Crystal Reports, PDF Sharp Version Control: Git Communication: Microsoft Team, Skype

FBR DIGITAL INVOICING SYSTEM

Successfully integrated business systems with FBR (Federal Board of Revenue) platforms, ensuring compliance with government tax regulations. Implemented real-time invoice reporting and e-invoicing systems, aligned with FBR requirements. Developed and managed API integrations for seamless communication between ERP/POS systems and FBR servers. Monitored and troubleshot integration issues to maintain 100% accuracy in tax reporting. Coordinated with cross-functional teams to ensure smooth adoption of FBR digital invoicing and tax filing processes.
Gained hands-on experience in data validation, secure transmission, and regulatory compliance related to taxation systems. Provided training and support to staff for using FBR-integrated solutions effectively.
